1932 Game Regulations.

Regulations under the Game Act protecting big game, game birds, and other birds and animals, have been announced in the Alberta Gazette, having been made by order-in-council effective August 1.

The regulations declare that no one shall, at any time, hunt swans, cranes, pheasants, or any grouse, other than sharp-tailed grouse, (otherwise known as prairie-chicken).

The season south of the Clearwater and Athabasca rivers opens at noon on September 15th and closes November 14th, for ducks, geese, rails, coots and Wilson's snipe. Other game birds may be shot on the dates listed below:

Bag limits are provided as follows: Ducks, September 15th to October 1st, 100 per day; October 1st to November 14th, 25 per day, 100 per season. Geese, 10 per day, 25 per season.

Prairie-chicken may be shot between October 1st and 31st in the region bounded by the C.P.R., on the Kerosbert-Coronation-Lacombe branch where it crosses the fourth meridian, west along the line to Tail Creek, downstream to where it flows into the Red Deer river and up the river to its source; between October 1st and 15th, south of this region.

Bag limit of 5 per day and 50 per season is provided for prairie-chicken in the northern section and 25 per season in the southern section. Hungarian partridge may be shot between October 1st and November 30th and the bag limit 15 and a season limit of 200.

Monday, Oct. 10th, Thanksgiving Day

Thanksgiving Day this year will be observed on Monday, October 10. A proclamation fixing this date has been issued. Since, by act of parliament, Thanksgiving was divorced from the observance of the Armistice anniversary, the desire is to have the former festival a month ahead of Remembrance Day.

High School Examination Averages & Percentages

The results of the departmental examinations this year were, on the whole, very satisfactory, the percentages of passes in all units but two being above the provincial average. The following is a synopsis of the results:

	No. Writing	No. Passed	Avg. Marks	Per Cent Passed
Literature 4,	5	56.5	71.4	
Composition 4,	5	54.1	71.4	
History 4,	6	62.7	85.7	
French 4,	6	57.3	85.6	
Literature 3,	27	22	58.6	81.4
Composition 3,	26	22	55.4	84.2
History 3,	27	20	58.4	74.7
French 3,	9	7	58.6	77.7
Geography 1,	18	15	59.9	83.3
Geometry 2,	26	24	67.8	92
Art 1,	13	10	59.7	76.9

Young Ladies Entertained.

Misses Nelda and Dorothy Huget who are leaving this week with their parents to reside in Edmonton, are being entertained this week at a number of social events in their honor. Miss Annie Currie entertained them to dinner on Tuesday evening.

On Wednesday afternoon Dorothy Ranton entertained at bridge and in the evening Miss Margaret Geiger gave a dinner in their honor. On Thursday Miss Evelyn Liesmer will entertain them at tea and Miss Bernice McGhee at bridge in the evening.

Mrs. E. V. Woodcock will also give a tea in their honor on Friday afternoon.

The Misses Huget will attend the Normal School at Edmonton.

LOCAL & GENERAL

Mrs. W. G. Evans was a Calgary visitor this week.

Mrs. T. Stark, of Calgary is visiting with Mr. and Mrs. J. A. McGhee.

Mr. A. Russell, principal of the High School, returned from his vacation on Monday.

Mrs. E. V. Woodcock and family returned from Sylvan Lake last Wednesday.

Mr. Lewis Morrell, of Colo, Iowa, is visiting at the Rodney home this week.

Jessie McCoy, Bernice McGhee, Pete Booker and Fred Evans were among those who wrote on examinations at Calgary recently.

Mr. and Mrs. P. E. Lunt left on Saturday for a week's vacation at Wyndel, B.C., with Mr. Lunt's parents.

Mr. and Mrs. J. W. Hulton and Mr. J. E. Huget motored to Edmonton Friday last and returned home Sunday night.

Messrs. W. R. Hartley and Del. Williams attended the cricket match between Olds and Calgary Bankers and Brokers at the O.S.A. Sunday.

Miss Edna Helm wrote an examination at Calgary on Monday, and will commence her teaching duties at Torrington this week.

Mr. and Mrs. Ed. Marcellus and family drove to Banff on Sunday and spent the day with relatives at that resort.

Miss Irene Scott, of Bergen, and Miss Clara Rindall, of Zella, are visiting the Misses Ruby and Irene Kercher this week.

Congratulations to Mr. and Mrs. Tom Morris, a son was born at the Didsbury Hospital on Sunday, Aug. 28th. Tom is wearing a smile you can't wash off.

Mr. E. G. Ranton drove to Edmonton on Sunday and returned on Monday accompanied by Mrs. Ranton, Grace and Bill, who have been spending the holidays at their cottage at South Cooking Lake.

Mr. Ellwood Evans left for Pincher Creek on Sunday, to re-commence his teaching duties. Mr. Howard Evans has taken a school near Lacombe, and left for that point on Tuesday.

Mr. Frank Moyle, together with some friends, who have been on a three-months' prospecting trip in the northern part of British Columbia, returned home Friday. The party outfitted at Vanderhoof, B.C., and taking packhorses from there, travelled about 250 mls. north. They saw signs of gold on several creeks, but did not come across any in paying quantities.

Mrs. Bennie St. Clair (nee Juanita Wilson) entertained at a light tea last Thursday afternoon in her new home. The guests included: Mrs. E. St. Clair, Mrs. E. A. Deadrick, Mrs. Tom Finley, Mrs. E. Austin, Mrs. Ed. Barnes, Mrs. Ellis Barnes, Mrs. Ed. Blain, Mrs. Jim Desolin, and Mrs. Doras Wilson. Misses Eileen St. Clair, Nola Finley and Nellie Wilson.

U.G.G. Declare Dividend

United Grain Growers Limited have announced the payment of a dividend at the rate of 5% on the paid up capital stock of the company out of earnings for the fiscal year, ending July 31st, 1932.

In making the announcement during a directors' meeting held at Calgary, R. S. Law, president of the company, stated that the earnings of the company had been sufficient to pay bond interest, to provide full depreciation, and after payment of the dividend, to permit a satisfactory addition to the surplus accounts of the company.

Dividend cheques will be mailed from the office of the company on September 1st to shareholders of record at July 31st, 1932.

Obituary.

WILLIAM LIONEL COATES.

We regret to report the death of William Lionel, youngest son of Mr. and Mrs. Wm. H. Coates, who died at the Didsbury General Hospital on Monday, August 29th.

The funeral was held at the Knox United Church on Wednesday, August 31st. Rev. Spencer officiated, assisted by Rev. J. Dean, of Vulcan.

You can save at the Harvest Sale at Builders Hardware.

Mrs. A. K. Franklin celebrates her 84th birthday this week.

Mr. Roll Hawkes, who has been spending his vacation here, returned to Calgary Sunday.

Mrs. J. Bailey and Miss Dorothy Wingley, of Edmonton, are visiting their mother, Mrs. W. Wingley, who underwent an operation at the Didsbury Hospital on Monday.

The sermon at Zion Evangelical Church Sunday morning will be: "The Stewardship of Talents," and in the evening there will be a special Labor Day service, with a sermon for those who toil.

Farewell Reception

To Mrs. J. E. Huget

On Tuesday afternoon Mrs. J. E. Huget, who is leaving the district to reside in Edmonton, was honored at a farewell reception by members of the local chapter of the I.O.D.E. The members expressed their regret on losing a member who had been so active in the welfare of the organization, and all joined in wishing her success and happiness in home. She was presented with three beautiful Crown Derby cups and saucers.

On Wednesday evening Mrs. Huget was tendered a farewell by members of the Rebekah Lodge at the home of Mrs. C. Mortimer when she was presented with a Rebekah Jewel in recognition of her services to the Lodge.

During her long residence in Didsbury Mrs. Huget has been very active to work for both the I.O.D.E. Chapter and the Rebekah Lodge. With the I.O.D.E. she brought honor to the local chapter, when elected for two years as "Echeons" secretary with the Provincial Chapter and at the last convention, when she was elected Assistant Organizing Secretary for the Province. She was also made one of the two National Counsellors for Alberta.

With the Rebekah Lodge she was always one of the most active workers and went through all the chairs of the local lodge and for a number of years has had charge of the degree team.

Mrs. Huget also took an active interest in the affairs of the town, being for several years a member of the Library board, and during the past year has been a member of the schoolboard.

Labor Day, Monday September the Fifth

Monday being Labor Day, all the stores and business houses in Didsbury will be closed. The stores will be open Wednesday afternoon.

Mutual Trust Must Be Re-established

One of the most interesting and thought provoking articles it has been our privilege to read for some time, and in these days of depression and pessimism it is as refreshing as a heavy shower on parched land, appeared in a recent issue of *Toronto Saturday Night* from the pen of Nicholas Ignatieff, a gifted young Russian engineer and thinker now resident in Canada. Mr. Ignatieff knows his native land and has written thoughtfully and sympathetically of it, but in the article to which we now refer he writes of "the British Empire as a new Canadian see it."

As he sees it the British Empire is not menaced so much by external enemies, by Bolsheviks or Communists, as by cross materialism within the Empire itself who insist on dealing exclusively with material, economic values—those individuals who have abandoned the best traditions of the Anglo-Saxon race and have plunged into the abyss of crude money-worshiping, greedily, corrupt politics which care nothing for duty and public service. The real enemies of the Empire are those who have cut themselves away from the vital sap of the historical, spiritual life of the mother country.

Mr. Ignatieff declares that it is not only a conviction, but the conviction of one of the foremost economists of the British Empire, Sir George Paish, that the way to general recovery does not lie so much in the field of economics as it does in the moral, spiritual sphere, which affects primarily our politics, and reflects adversely on economic life. Sir George Paish points out that as long as politics are dominated by fear, suspicion, distrust and narrow self-sufficient nationalism, no economic remedy can solve the depression; and just as soon as our mental attitude is changed and gives place to a desire to co-operate, compromise and trust one another, the economic situation will solve itself. In his book "The Way to Recovery," Sir George declares: "By replacing fear with confidence, injustice with justice, and antagonism with co-operation, a new and infinitely greater era would be introduced."

Continuing, Mr. Ignatieff says that when it was pointed out that one of the root causes of depression is the collapse of our present credit system, it is never realized by the crude materialist that here we are dealing practically exclusively with moral values. In the first place, credit being based on the future, it is obviously non-material; it is primarily based on trust. The general breakdown of credit implies nothing more than the collapse of morals, the break-down of mutual trust. Internationally, countries are no longer trustworthy because they do not honour obligations, because they are suspicious and selfish and greedy. Within nations, the same applies among individuals—there is general misuse of credit—credit is employed largely for anti-social purposes by greedy, unscrupulous, immoral individuals. The solution of the paradox of scarcity in the midst of plenty is spiritual, not material. A little thought will convince one of the truth of these observations, yet they are dubbed "platitudes" by so many worldly wise people.

Until fear is dispelled, suspicion allayed, confidence restored, there can be no real and lasting economic recovery, because, until these better conditions prevail, credit cannot be re-established. Credit is founded upon these things; trust is the one permanent foundation upon which a credit structure can be erected, and until credit is restored the world will remain economically sick. So long as fear and suspicion rule men and nations, so long as narrow nationalism, because of such fear and suspicion remains the guiding policy of the nations, so long will trade obstructions be maintained, so long will there be an absence of credit. And just so long will the peoples of the world suffer economic hardship and loss. Therefore, it can be repeated, what the world stands in need of today is a spiritual readjustment rather than economic reorganization. Given the first, the second will automatically and quickly follow. But without the one the other is impossible.

Lack Real Leadership

U.S. Public Opinion Not Yet Ready For Debt Reduction

The New York Evening Post, agreeing that virtual cancellation of war debts must come, says that general United States "public opinion is not quite ready for the debt reduction." It is a similar proposition to the one which heretofore has been recognized as inevitable. "Public opinion" is not quite ready because the United States public men and the press have persisted, chiefly for political purposes, in pending, though they must have known better, that the debts were collectable. When they begin to deal with the question realistically, as is now the case, public opinion in the United States will accept the cancellation, as not only inevitable but desirable. The people are all right if they are given competent leadership. But what leadership they have had, in all the allied countries, since the war—Winnipeg Free Press.

"Well, I've brought back the car you said no."

"How come?"

"When I thought it I thought '1932' was the license number, but now I realize it's the year of manufacture."

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Langley, Moncton, N.B., writes: "I can certainly recommend Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels."

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I would have to sit down. I took 'Dr. Fowler's' and was soon relieved."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Poor Crop Prospects In Russia

Believe Country Will Need All Its Grain For Food

Poor crop prospects in Russia are indicated by reports by districts which the Dominion Bureau of Statistics received by cable from its London correspondent. "Grain exports," the summary declares, "are dependent upon the policy of the present government and the urgency of the need of foreign currency. The country needs all its grains for food, especially in view of the continued acute shortage of other foodstuffs."

Since it was the flood of Russian wheat on the market last autumn that broke the prices, the Russian crop prospects are of particular interest to Canada. Last year Russia exported, to July 31, 71,000,000 bushels, but the present report indicates that it will reach nothing like those proportions this year.

The summary states: "Vegetables are lacking for the winter months and the vegetable constituent of a large part of the diet as grain reserves, excepting army supplies from 1933 crop, are consumed. The foregoing and other factors, including a tremendous discrepancy between open market and collective prices, the freedom of peasants to sell on the open market after December, and an acute shortage of manufactured goods to trade for grain, indicate unprecedented difficulties in collecting the government's share of the harvest. Much poorer crops than last year are indicated in the areas around export outlets."

Oldest In The World

Ancient Skull Is Found While Excavating In London

The oldest known human skull belonged to a London woman, G. Elliot Smith, a professor of anatomy at the University of London, stated at a meeting of the international congress of pre-historic and proto-historic sciences.

"The skull is known as the Lloyd's skull," he said, "and was found in blue clay 40 feet below the surface during excavations for the new home of Lloyd's corporation in Lendeham Street. It belonged to a woman whose age, old, who probably was left-handed."

After considering all the evidence and carefully studying all other known skulls of the kind, Professor Smith said, he decided the London skull represented the earliest genuine remains of homo sapiens, giving it pride of place over the Java man, the Peking man, and all other pre-historic finds.

The other attendees at the congress expressed great surprise over the announcement and left the hall immediately afterward to examine the skull and discuss the problem.

No More Asthma. Dr. J. D. Kellogg's Asthma Remedy sounds the death knell of this trying trouble. It cures the awful chokes and painful breathing. It guards against night attacks and gives renewed ability to sleep and rest the whole night long. Much is claimed for this remedy, but nothing is so true as the demonstrated fact that it will suffer from asthma try it and convince yourself of its great value.

In Times Of Peace

Germans Learning Protection Methods Against Gas Attack From Air

Classes have been established in Berlin to train women in the steps they must take for the protection of their household in the event of a gas attack from the air. Lectures are given on such subjects as how to make cellars gas tight, the use of the "Women's Air Defence League" are being established in several centres throughout the country.

Keep Dough's Egyptian Liniment always in the stable ready for immediate use. Removes proud flesh and inflammation, Thrush or Hoof Rot, and infection of cow's teat.

Earned A Lesson

A U.S. tourist made loud complaint in Aylmer, Ontario, recently. It seems he had complained to his gas supply at a station in another town, tending a \$10 U.S. bill in payment, and received his change in good Canadian money. On arrival at Aylmer he endeavored to change the Canadian money back into U.S. funds, and the most indignant when the bank demanded a discount. He learned a lesson in exchange which has been taught many a Canadian visitor to the U.S.

Exposition Of Fascism

Premier Mussolini Does Not Believe In Possibility Of Perpetual Peace

War is exalted by Premier Mussolini as giving "the seed of nobility to peoples" in his concluding exposition of Fascism for the Enciclopedia Italiana which was published in his old newspaper, *Il Popolo d'Italia*. Imperial peace, the premier says, is impossible.

His dictum of democracy is this: "It is a failure more tyrannical than tyranny." Fascism, as it generally regards the future and the development of mankind and apart from consideration of present policies, does not believe in the possibility of perpetual peace.

The premier reaffirms the doctrine that the state is supreme.

His discussion of religion is brief. "Fascism is not indifferent to religion in general or Italian Catholicism in particular. The state does not have a theology but a morality. Religion is not only respected but defended and protected."

Improving On Nature

Soil Heated By Electricity Can Be Kept At Even Temperature

Soil heating by electric current has come to be recognised as an aid to the growers to get their produce to market earlier and secure better prices. Equipment for heating beds, including cable and thermometers, was sold to farmers in the United States last year for the first time and several plants were set up in Canada. The bulk of the power is used between sundown and sunrise, making it practically an off-peak load.

The advantage of electric heating over steam or manure is seen in the more complete control. Flowers, such as Easter lilies can be speeded up and a greater percentage of growth is noted in cuttings of plants. Celery appear to respond particularly well to the electric current.

Persian Balm is unrivalled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands flawless and white. Especially recommended to soothe and relieve roughness and chafing caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. Persian Balm is the one toilet preparation for women who care for charm and elegance.

Serum For Addison's

Disease Is Expensive

Fifteen Ovens Are Required To Supply One Dose

Fifteen ovens are required for a newly discovered treatment for Addison's disease. Successful results of the treatment have been obtained at a London hospital.

Fortunately the disease which attacks the pituitary gland and stops growth is rare, for the expense of extracting one dose of serum from fifteen ovens is enormous.

The life of one patient was saved with this new treatment, but \$125 was spent on him to do it, and the treatment continued to cost \$5 a day.

But It In For Lane Back. A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the limbs are rubbed in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Many Placed In Employment

Saskatchewan Government Finds Jobs For 2,511 Persons In Five Weeks

Jobs for 2,511 persons were found by government employment offices in Saskatchewan during the five weeks ending July 26, official figures indicate. The number of persons applying for work at the nine employment offices in the province during the period were 2,926, and the number of employers' orders received were 2,637.

In addition to these figures there were 187 applications received from school teachers and 62 of these were located with positions.

The oldest cemetery in Canada is thought to be the one adjoining old Fort Anne, Annapolis Royal, Nova Scotia.

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschen Salts is appealing to girls and women who are striving for an attractive free-from-fat figure.

Here is the method they are following to keep fat and bring into blossom all the natural attractiveness that they possess: every morning they take a half-teaspoon of Kruschen Salts in a glass of warm water before breakfast.

They do this every morning—without missing one—for "it's the daily dose that takes off the fat." When Kruschen is taken daily, every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys, and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts is carried to every organ, gland, nerve, and fibre of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity, and a charming figure.

A Warmer Climate

Scientists Predict Radical Weather Changes In The Future

Some times you hear people who lament the present condition of our climate affairs express the wish that they might be living on this planet a few thousand years hence. They are sure there will then be more culture, more science, more highly improved mechanics and a happier state of things all around.

But, according to the recent pronouncements of scientists, there will be great drawbacks to the enjoyment of an Edenic existence in those future days, and one of them will be a devastating flood. Dr. W. J. Humphreys, professor of meteorology of the United States weather bureau, says that with the vanishing of the last 6,000,000 square miles of ice sheets at and near the poles and in the high mountains the oceans will be raised 151 feet.

In this dismaying prediction Dr. Humphreys is supported by Professor David, of Australia; Professor Meinardus, of Germany, and others, who also accept the theory of the American scientist that it's going to be pretty warm, at the present temperature, for as the ice melts the tropics will press upon them and they in turn will press upon the polar regions. — Los Angeles Times.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple, powerful, and painless, and though in some cases they may cause vomiting, that is an indication of their powerful action, and not of any nauseating property.

Business Is Growing

Increase In Air Passengers Between Germany and Russia

Air service between Germany and Russia continues to grow. Estimates are that "Derluft," the German-Russian air transportation company, will carry this year at least nine times as many passengers as it did in its first 12 months nine years ago. Mail, baggage and freight also have made great gains. Two services are operated, one between Berlin and Moscow, and the other from Königsberg to Leningrad. Scheduled flights have increased from two to seven times a week.

PERSONAL

SCOTTISH LADY AT PRESENT IN Canada, would like to take in charge one or more young ladies. Has experience in travel abroad, and with Canadian girls. Could act as companion to lady, in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and in Britain. Would willingly give more information to interested party—Apply Box 50, Winnipeg Winnipeg, Winnipeg, 175 McDermott Ave., East, Winnipeg, Man.

A Separate Grade For Garnet Wheat Is Sought By British Milling Interests

Continuation of the policy of permitting Garnet wheat to be mixed with Marquis and Reward varieties, or of marketing it as No. 1 and No. 2 Northern wheat will react sharply against all wheat sales from Canada, in the opinion expressed by William Smith, chief grain buyer and miller for the Scottish Co-Operative Wholesale Society.

The British miller, he stated, had found the Garnet variety unusable for milling purposes in Britain. At a recent meeting of the milling and grain interests held in London a decision was taken which called for the special grading of Garnet wheat as distinct from the other Canadian wheat varieties.

"It is to the interest of the Canadian wheat producers to see that this separate grading is undertaken," stated Mr. Smith. "The British buyer of wheat is determined that when he purchases grain on the Canadian market that the commodity supplied him will be either No. 1 or No. 2 Marquis or Reward. Any purchases of Garnet variety made will only be bought on the strict understanding that it is of this variety, and at a price considerably below that paid for the other standard Canadian varieties."

Reasons given by Mr. Smith for the objection of British and Scottish millers to Garnet were that it is lacking in protein values and also that its baking qualities lack strength and stability as compared with the Marquis and Reward varieties.

Mr. Smith was definite in his statement that he did not wish to be construed as advocating the non-growing of Garnet. "This may be the best type of wheat to grow in certain districts, but, for its successful marketing it must be labelled what it is and not be placed on the market as holding grade with the other Canadian varieties."

Unless there is a separate grade for Garnet, British millers and grain buyers will be forced to divert their purchases to other channels, and there is no assurance to them that the wheat bought will be the required Marquis or Reward varieties.

A further factor, said Mr. Smith, which must be considered is that the continuance of a policy of non-grading the Canadian wheat may result in definite lowering of the price of all Canadian wheat on the British markets.

Hard Task For Doctor

Valuable Snake In London Zoo To Have Glass Eye

Fitting a snake with a glass eye is the delicate operation which faces a doctor when he works on a huge Madagascaran boa in a London zoo. Some time ago this rare and valuable boa became blind in one eye. It was found that the eye was badly damaged and causing much pain.

The offending eye was plucked out, and the snake's normally good spirits returned.

But the boa had lost much in beauty. Therefore, a suitable glass eye has been selected, and will be fitted in.

New Natural Gas Producer

A large flow of natural gas has been struck in the Kinross field, southeast of Edmonton, Alberta. The new producer is expected to have a flow of 7,000,000 cubic feet per day.

Professor: "Once again I have come out without my umbrella." Mucha, Warsaw.

W. N. U. 1955

Believes Sun Spots Control Lake Level

Professor Finds Erie's Changes Follow Solar Cycle

Sun-spots control the level of Lake Erie, according to Prof. J. J. Nasasa, observatory director of Cleveland, after a detailed study in co-operation with William Koski, graduate student. Lagging two years behind, the water level in the lake rises and falls with the 11½ year cycle of minimum to maximum to minimum intensity in the spots on the sun, Dr. Nasasa's experiments showed.

The unusually high level of the lake in 1929 was due directly to the fact that the sun spots reached a maximum degree of intensity during 1928. Since 1929, the level has been receding annually and according to Prof. Nasasa's observations, will continue to do so for at least two more years.

LOVELY NEGLIGEE WEAR OR HOSTESS GOWN, WITH PARIS STAMPED ALL OVER IT

Who doesn't adore the new negligees—long to the ankles, making one look just as slim and graceful as a reed.

Well here is a model that will do the trick for you. And imagine how simple it is to make, too. In these days of complicated cuts, this will be as simple as eating apple pie.

It is cut fairly close about the hip area, and adjusted by an attached sash. Another interesting thing about it is the shoulder yoke which offers many schemes for contrast.

Such a model is today's pattern which can be carried out in crepe, satin, chiffon in plain or print, rayon novelties, etc. But is especially nice in two tones of crepe silk as the original.

Size 36 requires 4½ yards 55-inch with 1 yard 23-inch contrast tie.

Style No. 655 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Price of pattern 25 cents in stamps or cash (cash preferred). Wrap cut carefully.

TOWN

PROUD OF GAVEL

Mr. Stewart Young, of the Town Planning Branch of the Saskatchewan Department of Municipal Affairs, proudly displaying a gavel sent to him as Secretary of the Saskatchewan Land Surveyors Association by J. Lonsdale Doupe of Winnipeg. The gavel is made from oak grown on grounds of the pioneer homestead of the Inkster family at Kildonan, Manitoba.

Red Clover Seed

High Grade Seed Brings Three Cents Per Pound More Than O-dunary

According to a news report going the rounds of the press, farmers of the Stittville (Ontario) district, recently sold a shipment of 33,000 pounds of red clover seed which was graded and sealed as Certified, No. 1. This seed brought 3 cents per pound more than dealers were offering for ordinary No. 1, proving once more that it pays to grow the best. What the Stittville men when the World's Grain Exhibition and Conference takes place at Regina next year. At this great all-Canadian, open to the world show, there are four classes for clover seed with \$5,500 in 110 cash prizes. There are three firsts each of \$200.

Creamery Butter Production

The quantity of creamery butter produced in Canada in 1931 is the largest ever recorded by the dairying industry of Canada. It amounted to 225,000,000 pounds, an increase of about 40,000,000 pounds over the previous year. There are 2,090 dairy factories in operation in Canada.

Keeping Up With Others

Idea Is All Right In Matter Of Progress

In one sense we must keep up with others. Their success inspires us. A student should not let another student outdo him? And the progressive ideas of other people often lead us to better ways of doing business, and to better methods of living. Keep up with good sensible people!

But many prosperous people act a bad example. They spend too much money on fine houses, and expensive dress and jewelry and automobiles. You may have enough to keep up with them, but I advise you to pay no attention to their example. Have simple habits. Live in your own way, according to your own taste, and well within your means. Remember, not all "high-fliers" are able to fly so high! "Up like a rocket, down like a stick!"

It is pitiful to see some poor people trying to keep up with foolish rich people! Everybody knows they are poor and living beyond their means. They thus lose their credit and the respect of sensible people. Poverty is not a crime. No sensible rich man looks down on his poor neighbor—on the other hand, he has great respect for a sensible, industrious poor man!—J. P. Greene.

Well Known "Mrs. Grundy"

Famous Character Came Into Existence In English Play

That famous character "Mrs. Grundy" came into existence in a play called "Speed the Plough," written by Thomas Morien and produced some hundred and thirty years ago. In this play one of the characters has a habit of dragging her neighbour, Mrs. Grundy, into everything she says. At last her husband bursts out: "It is always 'What will Mrs. Grundy say?' What will Mrs. Grundy think?" Actually, Mrs. Grundy never once appears on the stage! But the constant reference to her opinions appealed to the public fancy and she she still survives as a stickler for the proprieties.

SPRING-CLEANING AN EMPRESS

Under special arrangement with the Dominion Government the Canadian Pacific Empire Liners will, in future, have their annual summer overhaul in the great drydock at Victoria, British Columbia, instead of at Hong Kong, as in the past. Our picture shows the R.M.S. Empress of Russia in drydock, the first of the Canadian Pacific Fleet to be spring-cleaned in Canada. The "Empress of Russia" is 520 feet long, with a beam of 48 feet, but she looked small in the mammoth Victoria drydock which is 1,150 feet long with a minimum width of 124 feet. The drydock has a capacity of 12,000,000 gallons yet can be pumped dry in four hours.

The Victoria dock is exceeded in size only by the Commonwealth Dock of Boston, which is 29 feet longer. The new Southampton dock is 1,200 feet long but over all is not as large as that at Victoria.

The Dominion Government, in order to bring the work to Canada granted special concessions which will result in the expenditure of some \$150,000 on labour plus the cost of material.

The development of interest in historic sites and landmarks throughout Canada has increased greatly during the past few years, mainly as a result of the excellent work being carried out by the Department of the Interior on the recommendation of the Historic Sites and Monuments Board of Canada. The Board, which recently concluded its annual meeting in Ottawa, was formed in 1919 with the sanction of the Minister of the Interior, to advise the department on the preservation of such monuments and sites as were considered of pre-eminent national interest. The chief objects in view were the education of the nation in the history of the country, the stimulation of patriotism, the commemoration of the deeds of those who have a significant part in the exploration, defence and development of the country, and in addition the preservation as national property of sites having outstanding historical interest.

The first meeting was held in October, 1920, and the name "Historic Sites and Monuments Board of Canada" adopted. The Board, which is composed of eminent historians chosen with a view to having representation from all parts of Canada, is honorary in character. The recommendations of the Board are carried out by the National Parks Branch, Department of the Interior, Ottawa. Up to the present time 190 sites have been marked with a standard bronze tablet approved by the Board.

Among the sites recommended for marking at the recent meeting of the Board are those of the first iron furnace in Upper Canada, at Lyndhurst, Leeds County, Ontario; the first submarine telegraph in North America, between Prince Edward Island and New Brunswick; and the fur-trading post of Norway House at the north end of Lake Winnipeg, in Manitoba. The inauguration of the first stage route between Quebec and Montreal, and the signing of the Indian treaties made near Orillia, Ontario, are also to be commemorated.

The first iron furnace in Ontario was constructed at Ramore Falls, township of Lansdowne, County of Leeds, by Wallis Sunderlin in 1801, and was operated until 1812. The first submarine telegraph cable in North America was laid in November, 1852, by the steamer "Ellen Gibson" between Cape Tormentine, New Brunswick, and Carleton Place, Prince Edward Island. Treaties made with the Indian tribes in 1788, 1815, and 1818, which transferred to public control the ancient country of the Hurons lying north and west of Lake Simcoe, will be commemorated with a suitable marker at Orillia, Ontario. The importance of Norway House in the early history of Canada will be perpetuated with a marker reviewing the chain of events connected with the famous fur-trading post in Manitoba.

New Pastime For Blind

Invention Enables Sightless Persons To Do Crossword Puzzles

A London doctor has made an invention whereby the blind can do crossword puzzles and acrostics. The inventor is Dr. F. W. Alexander, a former medical officer, and the inspiration came to him as he passed a laundry.

The invention is based on the Braille reading system for the blind, and is composed of a laundry-board studded with nails denoting groups of the alphabet. Numerous games can be played on this device.

Client: "Your defences are much better than they used to be."

Barriester: "Yes, I only learnt the art of defence after I was married."—Lastige Kolner Zeitung, Cologne.

A Mistake.

Of course, we are all human and liable to mistakes. The tendency of humanity to err must be always taken into account whenever we would attempt to criticize. Nevertheless a certain amount of accomplishment is expected even from the weak and incompetent.

No doubt, the upkeep of a village such as Didsbury becomes a burden at times to those who are responsible for its care. We do sympathize with those who give their time to public service from year to year without remuneration or thanks, and who sometimes feel from the response they receive that it does not make much difference whether they fulfill the duties of their office or not. When the citizens of a town do not take an interest in the public welfare we must not expect too much from the officials, but where there is no vision the people perish. Without leadership anything worth while is never accomplished. Someone must go ahead.

One would think that property owners would destroy the unsightly weeds and grass about their residences and fields, without anyone having to point out to them the need of it, but when they neglect to do this, then the proper authorities should remind them of their duty, and if a reminder does not prove sufficient to arouse their patriotism and self-respect the town should go ahead and clean up the weeds along their roadsides and fences and add the expense to the tax account. If some are allowed to let their roadsides grow to weeds it will only be a little while before the whole town will be seeded down with them. "Spare the Weed" is a slogan of false economy. It is a mistake for which we will have to pay dearly in the future.

Even if collections for this work could not be made in all cases, it would still be good business to clean up the town, as it would give employment to jobless men who will be on the town for relief next winter, unless some opportunity is given them to earn something. The money will have to be spent for relief, if not for wages. Better to cut the weeds and tidy things up a bit and have something to show for the expenditure. To let our villages grow to weeds is to give tourists and visitors the opinion that we are careless, if not shiftless. It is therefore to our advantage in every way that this work be done. It should have been done long before this.

—Contributed.

Cost of travel to Eastern Quebec, the Lower St. Lawrence and to resorts in the Maritime Provinces has been deflated this summer in a fare revolution that has never been equalled in the history of the railways of Canada. This reduction works out at about one and one-half for the round trip to any one of a score of glorious summer centres on Canada's unsurpassed Atlantic seaboard with proportionately reduced fares to many other destinations in eastern Quebec and the Maritime Provinces which are also in effect from Montreal and west, and also in Ontario, Didsbury, Capreol, Windsor, Sarnia and east. This great concession by the railways of Canada is on offer during the month of August with a return limit of 21 days, excluding the date of sale. (652)

LOCAL & GENERAL

Bargains galore during September at the Builders Hardware.

Mr. Henry Goehring made a trip to Calgary on business Monday.

School Fairs will be held at Olds, September 7th; Sunnyslope, Sept. 27th, and Mountain View, Sept. 28th.

A rural mill route has been established east of Olds. The first mail will go out on Friday, Sept. 2.

Mrs. Harvey English, of Calgary, visited last week with her sister, Mrs. P. E. Lunt.

Harold Hardy was a business visitor in the southern city for a few days this week.

Miss Lila Wrigglesworth, who has spent a three-weeks' vacation at Red Deer, returned home last week-end.

Miss Olive Chamberlain, of the Red Deer telephone office, is spending her vacation at her home here.

Mr. and Mrs. J. Shanks and Miss M. Shanks, of Nordegg, were visitors at the manse on Monday.

Mr. M. B. Clemens motored to Edmonton on Friday, where he visited his son, Mr. Harold Clemens, and family.

Belle Daniels and Warren William in "House of the Family" at the Opera House tonight (Thursday). Fascinating, irresistible.

Mr. and Mrs. George Hawkes, of Calgary, visited with their nephew, Mr. Herman Hawkes and family this week.

Victoria Thomson, L.R.A.M., will be resuming Piano Lessons on Friday September 8th at the home of Mrs. V. A. Gillrie, on the Edmonton trail, across the track. (34)

The Saturday Night Dances at the Opera House are in full swing again. Dance to be given on Friday, August 26th, at 8 o'clock. Admission 30 cents. (34)

Mr. and Mrs. A. G. Studer drove to Lethbridge on Sunday, returning the same day. They were accompanied by Mr. and Mrs. Cecil Studer, who have been spending a vacation with their parents.

Saw Monday, September 5th, Labor Day, for the Big Waltz Competition Dance to be held at the Olds Arena. Two silver cups for the best couple in competition. Let's all dance with "Dick's Dicky Birds" (35)

Miss Winifred Studer entertained at bridge last Saturday afternoon in honor of Miss Alida Hugst, who leaves this week for her school at Dayland. Miss Lola Homberger and Miss Beatrice Kendrick captured the honors.

The W.C.T.U. will meet at the home of Mrs. Boettger on Thursday, September 8th at 3 p.m. Superintendents' reports and other departmental work will be taken up. All members and friends are cordially invited to attend.

The Alberta Pacific Grain Company Ltd.

COMMENCING business in the North-West Territories in 1901—four years prior to the formation of the Province of Alberta—The Alberta Pacific Grain Company, and predecessor Companies, carries in its records a long list of service to the farmers of Alberta.

ALBERTA Grain Company, Limited, under the able management of John E. McFarland, commenced business in 1901. Total production of wheat in Western Canada in that year had reached less than 65,000,000 bushels. Under Mr. McFarland's policy of fair dealing with all farmers, the growth of his Company kept pace with increasing wheat production in the West. In 1912 Alberta Pacific Grain Company, Limited, was brought into being under guidance of Mr. McFarland and consisted of an amalgamation of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.

THE "A.P." organization continued to grow. Its elevators followed the railway construction across into the newly organized area of Alberta and extended its operations into Saskatchewan and Manitoba.

WITH the completion of the building of the Panama Canal the "A.P." became a pioneer in the movement of grain to import markets through the Western route. Transient elevators having a capacity of 6,250,000 bushels have been acquired by the Company at the Port of Vancouver.

THE "A.P." system has passed through the financial stress of 1907-08; the war and its aftermath; boom periods and the business upheaval of the past three years—a period of years, many of which have been obscure and filled with business uncertainties. In all its three decades of dealings with thousands of farmers and the handling of hundreds of millions of bushels of grain, the Company has never failed in an obligation to any client. Among its customers to-day are farmers of Alberta who drew the first bushel of grain they produced in the Province to an "A.P." elevator.

FAIR DEALING with its customers, coupled with competent office and field staffs efficient physical grain handling equipment and desire and ability to return to the grower the most that can be obtained for his grain, has brought the "A.P." system from its humble beginning in 1901 to its present position in the grain trade of Canada.

THE policies of the "A.P." today are real and still continue to be, those of the founder of the "A.P." system.

Welcomed to Scotland

Six hundred Canadians who call Glasgow home, were greeted on their arrival in the Clyde city by the Canadian Pacific liner "Duchess of Bedford" for a reunion.

Gathered together from all parts of Canada, and transported by special train to Montreal, the Glaswegians are making a two-months stay, during which they are being entertained by the City of Glasgow, its manufacturers, and their friends. A procession opened Tuesday, July 26th, when the Lord Provost, magistrates and councillors held a reception in the Art Galleries at Kelvingrove.

The party, which left Montreal in the Duchess of Bedford, July 6, returns from Glasgow Saturday August 20, in the same 20,000-ton liner.

**History of Alberta-
-Pacific Grain Co.**

The Alberta Pacific elevator in this district is part of a system of 375 country elevators, coal sheds and flour warehouses located in principal grain-growing areas throughout Alberta, Saskatchewan, and Manitoba and operated by the Alberta Pacific Grain Company, Limited. Terminal elevators of the company at Vancouver have a capacity of more than 6,000 bushels. In addition the "A.P." has terminal elevator connections at the Head of the Great Lakes, and office forces in Calgary, Winnipeg, and Vancouver.

The Alberta Pacific and predecessor companies commenced business in 1901 in territory now part of the province of Alberta. Wheat growing in that area was then in its infancy. What was to develop into the "A.P." system was brought into being by John I. McFarland, then a young man yet to earn his reputation in the grain trade. His record of fair dealing with all farmers and customers who came in contact with him, earned for him an enviable reputation, which he carried throughout the progress and successes in the Trade. The company soon expanded to all the principal grain-growing areas of Alberta, and into Saskatchewan and Manitoba.

With the commencement of movement of grain through the Port of Vancouver, upon the completion of the building of the Panama Canal, the "A.P." in 1924 became a pioneer in the development of the western movement of grain.

At its inception the management of the "A.P." realized the great asset of a grain company was personal contact to the greatest possible degree with its customers. The tool of the General Manager, John McFarland, was always open to any farmer to pass the time of day or to assist in the settlement of any difficulty being experienced in connection with the handling or marketing of grain.

When financial control of the Alberta Pacific changed hands in 1926, John McFarland retired from active participation in the grain trade, and devoted his time to his private interests, until in 1930 he was called upon by the Government of Canada to take charge of the liquidation of wheat stocks held by the pools.

In 1930 James R. Murray, who had built himself an enviable reputation as an executive of United Grain Growers Limited, was called upon to take over the General Management of the "A.P.," following retirement of the Stewart interests from control of the Company. Mr. Murray came to the company well known to the agricultural population of the West, and with a record of achievement in the extension and development of the U.G.G. throughout Alberta and Saskatchewan.

The policy of fair-dealing and contact with its thousands of customers so well established by the founder of the "A.P." system, is that of the present management by Mr. Murray.

ITEMS OF INTEREST

What a story the McLaughlin-Buicks used by Imperial Conference delegates could tell if they could only speak; what political and trade secrets have been whispered within their luxurious interiors in the past few weeks at Ottawa. Says a writer in "Mayfair": "Not the carillon, sending forth its music over the city from 53 bells, 10 lbs. to 10 tons in weight; nor yet the architectural dignity of that pile of stone which crowns Parliament Hill; not the cared-for charm of The Driveway, as our car rolled into Ottawa."

* * * * *

Parliament will probably open the first week in October, possibly Oct. 6, according to reports in government circles. This is considerably earlier than was previously suggested. A definite decision will be made by the cabinet very soon. The expectation is that the session will be adjourned after effect has been given to the agreements entered into at the Imperial Economic Conference. This may not take more than two weeks. The adjournment will likely be until the last of January.

* * * * *

There are 726,423 farms in Canada, and automobiles on 321,396 of them. Motorization of rural Canada has been proceeding rapidly. According to the Dominion bureau of statistics, automobiles on farms in Canada have doubled in the past 19 years. There is now a car for every 2.27 farms and the likelihood that this ratio will continue to enlarge steadily. Ontario has more cars to the farm than any other province, with an average of one for every 1.53 farms, and Quebec has the smallest ratio, with one for every 5.106 farms. Saskatchewan ranks after Ontario, with one in 2.10; Manitoba 2.12; Alberta 2.27; British Columbia 2.46; New Brunswick 3.26; Prince Edward Island 3.11, and Nova Scotia 3.83.

**Why Not Try
Pool Elevators!**

Alberta Pool Elevators are now operated under public license and are in a position to handle any grower's grain on the open market basis.

The excellent patronage extended to these Pool elevators during the immediate past crop year by many growers who were never members of the Wheat Pool, is testimony to the favorable reputation enjoyed by this co-operative elevator organization.

The Alberta Pool elevators are being operated on a basis of no discrimination between customers, and with the definite policy of extending fair and equitable treatment to all persons using its facilities. Why not give the Pool Elevator a trial?

Arrangements can be made to pool any proportion of a member's wheat that he may desire. Information regarding this can be furnished by your local agent.

CARTER'S PILLS

WORLD HAPPENINGS BRIEFLY TOLD

The Rothsay dock, one of the largest on the Clyde, has been temporarily closed on account of decline of shipbuilding.

Dividend on the common stock of Canadian Pacific Railway for the first six months of 1932 is not being paid at present.

The Church of Scotland plans to build 30 churches in Scotland in the next seven years, 10 of which will be in Edinburgh and five in Glasgow.

Representatives accompanying the Japanese Olympic team plan to buy the cabin of each athlete from that country who wins an Olympic title.

Newton, Mass., one of Boston's wealthiest suburbs, has nearly two automobiles for every family. There are 14,000 families and 23,000 automobiles.

Florenz Ziegfeld, New York theatrical producer, who died recently in California, bequeathed his whole estate to Billie Burke, his widow, and Patricia, their daughter.

An air-tail was chartered from Imperial Airways by a London woman for a return flight to Chelmsford, Essex, where she placed a wreath on a grave in the churchyard.

Art and agriculture are the only creative professions in the world, says John Erskine, novelist. "By artists I mean all craftsmen who are creators," he said, "and by agriculturists I mean all those who produce and create wealth from the soil."

San Francisco's new \$6,000,000 opera house, the first and only municipally owned opera house in the United States, will be formally dedicated next month as a war memorial. It will open Oct. 15, with performance of Puccini's "Tosca."

Indicative, it is said, of an improved lumber outlook, is the protest filed with the British Columbia government by mill men against export of logs. Loggers, however, contend that they are in a position to satisfy all demands of the mill men as well as taking care of any export trade being offered.

Britain's Unemployed

Seven and a Half Million People Depending On Government Aid

A wandering army of unemployed youths, vaguely reminiscent of the United States bonus army, is making its appearance in Great Britain as a result of increases in the number of jobless announced as 2,811,782.

Unemployment has made approximately one-fourth of Britain's 45,000,000 population dependent to some extent on government aid, for fully 7,500,000 men, women and children are existing wholly or partly on government or local relief in addition to the official total of jobless.

As a result of the latest official figures, an increase of 64,426 in the month of July and of 99,432 in the last year, the nation's relief machinery is scarcely able to cope with this situation.

A material that does not stop the ultraviolet rays from the sun, resembling glass, and not as fragile, has been made from natural gas.

Safe-trunk at home: "I should hate to open my own safe any other way." Musketeer, Vienna.

W. N. U. 1935

WORLD'S RECORD WHEAT MOVEMENT MARKS WELLAND CANAL OPENING

Carrying 575,000 bushels of western wheat, representing the product of over 41,800 acres of prairie land and the largest single cargo ever carried in any single ship on any sea, the giant S.S. Lemoyne, of Canada Steamship Lines, 633 feet long and the biggest vessel on freshwater, opened the Welland Canal officially on August 6 in the presence of His Excellency, the Governor-General, Rt. Hon. Stanley Baldwin, and the delegates to the Imperial Conference, Premier R. B. Bennett, members of the Cabinet and thousands of spectators.

Largest Grain Carrier

Boat That Is the Pride Of Canada's Inland Waterways

World's largest grain carrier, holder of all Great Lake freight records and pride of the inland waterways, the S.S. Lemoyne of the Canada Steamship Lines fleet, officially opened the new Welland Ship Canal on August 6. Officiating at the ceremony was His Excellency the Earl of Beasburgh, Governor-General of Canada, and delegates from all parts of the Empire attending the Imperial Conference in Ottawa.

Designed and built by Canada Steamship Lines at their own shipyards at Maitland, Ontario, in 1926, the "Lemoyne" is considered a triumph of Canadian achievement and is the proudest of Canadian shipyards. Since she first took the water she has captured all the major honors of the Upper Great Lakes freight carriers. Her records go even beyond freshwater for she has carried in single cargoes more grain and more coal than has ever been moved in any other single ship.

In 1929 the "Lemoyne" took on a cargo of 571,685 bushels of wheat, a crop of approximately 40,000 acres or more than 62 square miles of prairie land. In May 1930 she established a world record for the carriage of coal by taking aboard 16,538 tons and carrying it to Fort William. It required more than 200 railroad cars to bring this cargo to the ship.

Six hundred and thirty-three feet long, with a seventy foot beam, a depth of twenty-nine feet and a registered tonnage of 10,160 tons, the "Lemoyne" will be by far the largest ship ever to have entered Lake Ontario and will clear the way for the carrying of the great bulk of the wheat crop of the prairies to the ports of the east by water. The "Lemoyne" along with other ships of her type will no longer be confined to the Upper Lakes; her eastern terminal becomes Kingston, Ontario, and her east to west cruising radius more than one thousand miles.

During the last twelve months the Welland Canal has seen a series of new records established. Last year the S.S. Noronic, upper lake passenger liner and flagship of the Canada Steamship Lines, northern fleet, established the first of the series of records when she made her first voyage into Lake Ontario and visited the ports of Toronto, Hamilton and Kingston for the first time. On that occasion over one hundred thousand people from these three cities went on board the "Noronic" and the walls of the canal were lined with thousands of people during her historic cruise. The "Noronic" at that time was the largest vessel of any type to go through the canal and remains the largest passenger steamer to have entered Lake Ontario. Her length is approximately half of that of the "Lemoyne."

Following the establishing of this record by the "Noronic," giant upper lake freighters of the Canada Steamship Lines set three new marks for the canal in a little over a week. Early in July this year the freighter "Ashcroft" went through the canal with 360,000 bushels of wheat on her way to Kingston only to see her record broken within a few days by the freighter "Glencoe" with 380,000 bushels. Both these vessels had formerly been confined to the Upper Lakes.

Less than a week after the "Glencoe" had set her new record for grain she returned to Lake Erie and brought down to Hamilton 12,910 tons of coal, another Welland Canal record which will likely stand for some time. On her latter trip the "Glencoe" also shattered all records for cargo carried into the port of Hamilton.

Today the "Glencoe" is the largest boat ever to have entered Lake Ontario, but compared to the "Lemoyne" she is a small freighter. Her length of 596 feet compared with the "Lemoyne's" 633 feet and her capacity is approximately 38,000 bushels compared with the "Lemoyne's" 571,685 bushels.

Considered of special importance to the Empire since the Welland Canal in future will be the route used by most of Canada's grain ships, it was decided some time ago that the official opening should be on the programme of the Imperial Conference and efforts were immediately made to have the largest Canadian lake boat go through for this ceremony. Elaborate preparations were made for welcoming the "Lemoyne" to Port Colborne on her first voyage and that in addition to delegates, government officials and representatives from other provinces large crowds of people viewed the ceremony.

Testing Out New Device

Invention May Prevent Flying Students From Freezing Controls

A new device to overcome the danger of flying students "freezing" the controls of aircraft in a panic has been developed by engineers of the department of national defence and is now undergoing thorough tests.

An arrangement whereby the instructor can disengage the student's controls in flight was found unsatisfactory, because once the student had overcome his momentary panic it was necessary for the aeroplane to land before his controls could be connected up again.

The new principle under test provides a jointed control stick that becomes automatically disconnected when too much pressure is applied to it, and yet resumes its usefulness when the student's grip relaxes. The instructor in the other cockpit is provided with a normal control stick and has control of the aircraft at all times. By pulling on his stick he can force the student's control out of joint.

Limit To Cattle Exports

Less Than 35,000 Head May Be Shipped To England Next Year

Less than 25,000 head of cattle would be shipped to the United Kingdom next year from Canada, even if the restriction now imposed against Canadian cattle landing in Britain were lifted. This estimate was made in an interview recently by Hon. Robert Weir, Canadian Minister of Agriculture.

Reports which have gone out that the lifting of the restrictions would result in Canada shipping from 100,000 to 400,000 head annually to Britain are regarded by Mr. Weir. These reports would tend to fill the British market with four that his home market would be flooded by Canadian cattle, while no such danger really exists.

In ancient Babylonia, medicines were frequently mixed in beer.

Submarine Rendered Useless By Invention

British Admiralty Finds Sure Method Of Disabling Undersea Craft

The submarine, as a method of warfare, is doomed.

Unless protection against a new invention by the British Admiralty can be discovered, the submarine will be rendered useless for the purpose of fighting.

The efficiency of this new invention is so deadly that a submarine cannot hide from the largest ship which is equipped with it.

Tolling experiments have been made. Half a dozen submarines were sent out 24 hours ahead of two flotillas of destroyers. In six hours the destroyers had found them, and technically "destroyed" them.

Escape from the destroyer is futile. By means of a moving point, the operation of which is strictly guarded, the exact position, and distance of the submarine, no matter how far under the sea it is, can be unfailingly ascertained. Exhaustive tests have not yet found any way of counteracting the function of the detector.

Reserved For Royalty

Escort By Life Guards Is Honor For the Few

The honour of being escorted by Life Guards is reserved for members of the Royal Family, foreign Royalities and heads of foreign States who hold almost fixed positions. The honour is a jealously guarded one. For instance, the Duchess of York, although a great lady, daughter of a noble family, was not royal before her wedding. Accordingly, she drove her ceremony accompanied by a mounted escort of Metropolitan Police. Immediately she was married, an escort of Life Guards was hers by right. The regiments were formed, literally, as "Royal Life Guards," originating in two troops of Cavaliers who accompanied Charles II. into exile. During the monarch's stay in Holland they were organized in their present-day form.

First Gas-Lighted Street

Enterprise Launched On Pall Mall, London, England, In 1807

One hundred and twenty-five years ago—in 1807—for the first time in history, Pall Mall, in London, England, was lit by gas. The enterprise of a German called Winzer—after changed to Winer—was responsible. Winer's modest estimate of the profits was £225,000,000 a year, out of which he proposed to redeem the National Debt, in addition to paying his shareholders 1000 per cent. His company soon died, but Winer must be given credit for assisting in bringing gas lighting into popular favour.

According To Supply

The doctor was giving a lecture to a class of girls.

"Also," he remarked, "it has been found that the human body contains sulphur."

"Sulphur?" exclaimed a pretty young girl. "And how much sulphur is there in a girl's body?"

"Oh, the amount varies," said the doctor, smilingly, "according to the girl."

"Ah," remarked the girl. "That's why some of us make better matches than others."

Stops Summer Odors

The heavy smell which warm weather brings to many people is largely prevented by regular bathing with a free lather of Baby's Own Soap. The delicate aroma dispels all unpleasantness and the skin feels so refreshed, cool & sweet. Baby's Owns sells at 10c, a cake at dealers everywhere.

"Best for you and Baby too!"

Naval Armaments

Difficult To Distinguish Between Defensive and Offensive Weapons

Why all this bother about "offensive" and "defensive" naval weapons at Geneva? Is the submarine offensive? Are battleships, mine-layers and bombing planes defensive?

There is one simple rule by which every case can be decided: The other fellow's weapon is extremely offensive, your own is purely defensive.

Ask any schoolboy or baseball fan. The humble pop bottle is the most innocuous of objects, quite inoffensive. Only prejudiced persons like the umpire could possibly construe it as offensive. Again take the pea-shooter. Whoever heard of a schoolboy that used this mild little weapon for attack? As any boy knows, the use of the pea-shooter, like the water-pistol, are solely for the warding off of attacks by others, especially those armed with pea-shooters.

And so it is with submarines and the like. The gentle U-boat regarded the Q-boat as highly offensive, whereas we all know it to have been purely protective. During the war, some of us harbored dark thoughts about submarines. Quite unjustly, it now seems, according to the French and Japanese thesis. The under-sea boat has become the Poor Nation's Armor. It is the cheapest naval weapon for frightening off offensives, according to its backers.

The sad truth is quite evident. Weapons are defensive or offensive according to the uses to which they are actually put. When you have decided what the weapon is for, it is on the defensive, then, perhaps, you may decide whose weapons are offensive. Meanwhile, most nations seem to proceed on the principle that if a club is defensive, three clubs and a machine gun are twice as defensive.

Make Interesting Discovery

Canadian Scientists Gain Knowledge Of Universe Of Great Importance

New knowledge of the universe, stated to be of tremendous potential importance in the scientific world, has been gained by Prof. J. S. Foster and Dr. A. Vihert Douglas, McGill scientists who returned to the university following a month's research work conducted at the Dominion Astrophysical Observatory at Victoria.

Professor Foster declined to claim full success for their achievements until he and Dr. Douglas have had time to re-study their findings. He said, however, that the results of their work would quite likely create an upset of opinion among European scientists.

The two McGill scientists set themselves to examine the electrical fields of stars.

They conducted observations both at Victoria and at Pasadena, Cal. Only one day was spent at the latter place.

"What's that you're putting in your shirt pocket?" asked Murphy. "Dynamite," whispered Donovan. "I'm waiting for Casey. Evertime he meets me he slaps me on the chest and breaks my pipe. Next time he does it he'll blow his head off."

She: "They say that a sailor has a sweetheart in every port." He: "Yes, but this isn't port."—Buen Humor, Madrid.

For Creamed SOUPS AND SAUCES

If you have not tried St. Charles Milk you will be surprised at the improved flavor it gives to cream soups and sauces. It is handy and economical. Use it and you will find that you and your family will enjoy.

W.C. 12

Always ask for St. Charles by name and then you can be certain that you are obtaining the finest evaporated milk.

THE HOUSE OF DREAMS-COME-TRUE

MARGARET PEDLER

Author Of
"The Spectral Polly," "The Hermit Of The Bog,"
Hodder & Stoughton, Ltd., London.

CHAPTER XXVIII.—Continued

"Oh, yes, she did. It was quite clear in the afternoon when she started—looked like being a lovely night."

"But—but—"

Nick stammered and came to a halt. There was a look of bewilderment in his eyes.

"But who's she gone with?" he demanded at last. "I thought she said she intended stopping the night with Judith and Burke at their bungalow."

"So she did," replied Blaise. "Why? Have you any objection?"—smiling.

"No. Only—Nick frowned—"I don't quite understand it. Judith isn't on the Moor?"

"Not on the Moor?" broke simultaneously from Lady Anne and Blaise.

"How do you know, Nick?" added the latter gravely.

"Why, because—Nick's face wore an expression of puzzled concern—"because I saw Judith in Newton Abbott late this evening."

Blaise leaned forward, a sudden look of concentration on his face.

"You saw Judith?" he repeated.

"What time?"

"It must have been nearly eight o'clock. I was loitering along in Jim Crosswell's car to catch the seventy-five up train, and I saw Judith with one of the Holfords—you know those people from London—turning into the gateway of a house. I expect it was the place the Holfords are stopping at. They didn't see me."

"You're quite certain? You're made no mistake?" said Blaise sharply.

"Of course I've made no mistake. Think I don't know when I see her? But what's the meaning of it, Blaise?"

Tormarin rose to his feet, teasing the stump of his cigarette into the fire.

"I'm not sure," he said slowly. "But I'm going to find out. Madonn—" turning to his mother—"did Jean tell you exactly what Judith said when she rang her up on the 'phone about this moonlight party?"

"It wasn't Judith who rang up," replied Lady Anne, a faint misgiving showing itself in her face. "It was Geoffrey who gave the message."

Tormarin looked at her with a sudden awakened expression in his eyes. There was dread in them, too—keen dread. The expression of a man who, all at once, sees the thing he values more than anything in the whole world being torn from him—dragged forcibly away from the shelter he

could give into some unspeakable darkness of disaster.

"That settles it," he pressed his finger against the bell-push and held it there, and when Blaise came hurrying in response to the imperative summons, he said curtly: "Order me a fresh horse round at once—at once, mind. Tell Harding to send me Orion, and to look sharp about it."

"Blaise—Lady Anne's obvious uneasiness had deepened to a sharp anxiety—"Blaise, what are you going to do? What—what are you afraid of?"

He looked her straight in the eyes. "I'm afraid of just what you are afraid of, madonn—" of the devil let loose in Geoffrey Burke."

"And—and you're going to look for her—for Jean?"

"I'm going to find her," he corrected quietly.

Gravely had set its seal on all three faces. Each was conscious of the same fear—the fear they could not put into words.

"But why do you take Orion?" asked Nick. "The little thoroughbred mare—Believing that the journey quicker and be lighter of foot over any marshy ground on the Moor?"

"Orion can go when he chooses," returned Tormarin. "And he'll choose. Redding in a little bit of a thing though she's game as a pebble. But she couldn't carry—two."

The significance of Tormarin's choice of his big roan hunter, three-parts thoroughbred and standing sixteen hands, came home to Nick. He nodded without comment.

Silently he and Lady Anne accompanied Blaise into the hall. From the gravelled drive outside came the impatient stamping of Orion's iron-shod hoofs. Just at the last Lady Anne clung to her son's arm.

"You'll bring her back, Blaise?" she urged, a quiver in her voice.

"I'll bring her back, madonn," he answered quietly. "Don't worry."

A minute later he and the great roan horse were lost to sight in the mist of the night. Only the beat of galloping hooves was flung back to the two who were left to wait and wait, muffled and vague through the shrouding mist like the sound of a distant drum.

CHAPTER XXIX.

The Golden Hour

Orion had fully justified Blaise's opinion of his capabilities. As though the great horse had gathered that there was trouble abroad to which he must not add, he had needed neither whip nor spur as he carried his master with long, sweeping strides over the miles that lay between Staple and the Moor. He was as firm as a post, and the rush through the cool night, under a rider with hands as light as a woman's and who sat him with a flexible ease, akin to that of a Cossack, had not disturbed him in the very least.

Now they were climbing the last long slope of the white road that approached the bungalow, the reins lying loosely on Orion's neck.

The mist had lifted a little in places, and a watery-looking moon appeared through the clouds now and again, throwing a vague, uncertain light over the blurred and sombre moorland.

Tormarin had no very definite plan of campaign in his mind. He felt convinced that he should find Jean at the bungalow. If, contrary to his expectation, she were not there, he would enquire to whom he could apply for information as to her whereabouts, he would have to consider what his next move must be.

Meanwhile, his thoughts were preoccupied with the main fact that she had failed to return home. If she had accepted Burke's invitation to the bungalow, believing that Judith and the Holfords would be of the party, how was it that she had not at once returned when she discovered that for some reason they were not there?

Some weeks ago, during the period when she was definitely investigating the possibilities of an "unexploded bomb"—it was quite possible that the queer recklessness which sometimes tempts a woman to experiment in order to see just how far she may go—the mysterious delight that the feminine temperament appears to derive from dancing on the edge of a precipice—might have induced her to remain and have tea with Burke, chaperon or no chaperon. And then it

was quite on the cards that Burke's lawless disregard of anything in the world except the fulfilment of his own desires might have engineered the ride, and he might have detained her at the bungalow against her will.

But Blaise could not believe that a "tete-a-tete" tea with Burke would hold any attraction for Jean now—just some that day, just before the visit to London, when he and she had been discussing the affairs of Nick and Claire and had found, quite suddenly, that their own hearts were open to each other and that with the spoken word, "Beloved," the misunderstandings of the past had faded away, to be replaced by a wordless trust and belief.

But if it "had" attracted her, if—knowing precisely how much the man she loved would condemn—she had still deliberately chosen to spend an afternoon with Burke, why, then, Blaise realized with a swift pang that she was no longer his Jean at all but some other, lesser woman. Never again the "little comrade" whose crystalline honesty of soul and sensitive response to all that was sweet and wholesome and true had come into his scarred life to jewel its arid places with a new blossoming of the rose of love.

He tried to thrust the thought away from him. It was just the kind of thing that Nesta would have done, playing off one man against the other with the innate instinct of the born coquette. But not Jean—not Jean of the candid eyes.

Presently, through the thinning mist, Tormarin discerned the sharp turn of the track which branched off from the road towards the bungalow, and quickening Orion's pace, he was soon riding up the steep ascent, the moonlight throwing strange, confusing lights and shadows on the mist-wet surface of the ground.

Suddenly, without the slightest warning, the roan smelted and wheeled round, shying violently away from the off-side bank. A less good horseman might have been unseated, but as the big horse swerved Tormarin's knees gripped against the saddle like a vice, and with a stendy word he faced him up the track again, then glanced keenly at the overhanging side of the roadway to discover what had frightened him.

A moment later he had jerked Orion to a sudden standstill, leapt to the ground and, with the reins over his arm, crossed the road swiftly to where, clad in some light stuff that glimmered strangely in the moonlight, lay a slender figure, propped against the bank.

"Blaise!" Jean's voice came weakly to his ears, but with a glad note in it of immense relief that bore witness to some previous strain.

In an instant Tormarin was kneeling beside her, one arm behind her shoulders. He helped her to her feet and she leaned against him, shivering. Feeling in his pockets, he produced a brandy flask and held it to her lips.

OGDEN'S CUT PLUG

*If you "roll your own," use
Ogden's fine cut
cigarette tobacco.*

"Drink some of that," he said. "Don't try to tell me anything yet." The old spirit sent the chilled blood racing through her veins, putting new life into her. A faint tinge of colour crept into her face.

"Oh, Blaise! I'm so glad you've come—so glad!" she said shakily.

"So am I," he returned grimly. "See me a little more brandy. Then you shall tell me all about it."

At last, bit by bit, she managed to give him a somewhat disjointed account of what had occurred.

"I think I must have been stunned a little when I fell," she said. "I can't remember anything after stepping right off into space, it seemed, till—oh ages afterwards—I found myself lying here. And when I tried to stand, I found I'd hurt my ankle and that I couldn't put my foot to the ground."

"So—with a weak little attempt at laughter—"I just sat down again."

Blaise gave vent to a quick exclamation of concern.

"Oh, it's nothing, really," she reassured him hastily. "Only a strain. But I can't walk on it." Then, suddenly clinging to him with a nervous dread, "Oh, take me away, Blaise—take me home!"

"I will. Don't be frightened—there's no need to be frightened any more, my Jean."

"No, I know. I'm not afraid—now."

But he could hear the sob of utter nerve stress and exhaustion back of the brave words.

"Well, I'll take you home at once," he said cheerfully. "But, look here, you've no coat on and you're wet with mist."

"I know. My coat's at the bungalow. I left in a hurry, you see"—whimsically. The irrepressible Peterson element, game to the core, was reasserting itself.

"Well, we must fetch it—"

"Not No!" Her voice rose in hasty protest. "I won't—I can't go back!"

"Then I'll go."

"No—don't! Geoffrey might be there—"

"So much the better" grimly. "I'd like five minutes with him." Tormarin's hand tightened fiercely on the reins. "But he's hunting-crop his way in the mist and fetched up far enough away. Probably—with a short laugh—he's still searching Dartmoor for you. You'd be on his mind a bit, you know! Wait here a minute while I ride up to the bungalow—"

But she clung to his arm.

"No—not! Don't go! I—I can't be left alone—again."

The fear was coming back to her voice and Blaise, detecting it, abandoned the idea at once.

"All right, little Jean," he said reassuringly. "I won't leave you. Put my coat round you"—stripping it off. "There—like that." He helped her to sit up and fastened it with deft fingers. "And now I'm going to get you up to Orion and we'll go home."

"I shall never get up there," she observed, with a glance at the roan's great shoulders looming through the mist. "I shan't be able to spring—I can only stand on one foot, remember."

Blaise laughed cheerily.

"Don't worry. Just remain quite still—standing on your one foot, you poor little lame duck!—and I'll do the rest."

She felt his arms release the clasp of her, and a moment later he had swung his leg across the horse and was back in the saddle again. With a word to the big beast he dropped

the reins on to his neck and, turning towards Jean, where she stood like a slim, pale ghost in the moonlight, he leaned down to her from the saddle.

"Can you manage to come a step nearer?" he asked.

She hobbled forward painfully.

"Now!" he said.

Lower, lower still he stooped, his arms outthrust, and at last she felt them close around her, lifting her with that same strength of steel which she remembered on the mountain-side at Montevan. Orion stood like a statue—motionless—as if he knew and understood all about it, he knew slewed round a bit as though watching until the little business should be satisfactorily accomplished, and blowing gently through his velvet nostrils meanwhile.

(To Be Continued.)

All mothers can put away anxiety regarding their suffering children when they have Mother Gravel Worm Extirminator to give relief. Its effects are sure and lasting.

A railway season ticket, covering 175 miles of travel, was issued to a dog, at Plymouth, so it could accompany its mistress, a travelling saleswoman, on her trips.

You can cook 3 vegetables AT ONCE

**in the
same
saucepan
by using
GANAPAR**

Do each vegetable up in its own bag of Ganapar Cookery Parchment. There won't be any odor, not even from cauliflower. All the food value and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix!

Do the same with boiled or steamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No saucepan or kettle to clean up. When steaming meat, line your pan with Ganapar. Fats and juices won't burn. No more scraping or scouring of the pan afterwards.

You can use Ganapar repeatedly by simply rinsing it off and hanging up to dry. It doesn't absorb odors. Makes a perfect dust cloth. Silky, strong and doesn't spread lint. Made by the makers of the famous PARASAM Heavy Waxed Paper in the Green Box.

Special Offer
Most grocers, druggists and department stores have Ganapar on sale. But if yours hasn't, send this coupon direct to the makers and we'll give you a new and unique booklet entitled "Leflovers", containing one hundred recipes as a bonus for your trouble.

Applied Paper Products, Ltd.,
Hamilton, Ontario.
Enclosed find \$5 for which please send me one full size package of Ganapar Cookery Parchment and your 100 recipes for "Leflovers".

Melvin Notes

Miss Florence O'Brien visited with
Mrs. Bennie St. Clair on Tuesday.

Miss Eileen Darrer spent last
week with Miss Gladys Carlson.

Miss Ruth Johnston spent Sunday
at her home.

Mr. and Mrs. Walter Irwin, Mr.
Chas. Wilson and Jerry Eikson were
visitors at Ross Irwin's on Sunday.

Dorothy Young and Edgar Wig-
gins took up their duties at their
respective schools on Monday.

We notice that some young people
would rather sit out in the rain than
do chores.

Mr. Lee Swingle and son Bruce
motored to Calgary Thursday last,
where Bruce will take up his studies
in school.

Bill dropped around to claim the
man's white shirt that was found in
A. Krebs' barn after the dance on
Friday night.

Mrs. Geo. Young entertained the
Moyle girls, Mrs. Leeson and Mrs.
Chas. Young and Dorothy at tea
last Thursday.

Mr. and Mrs. Ben Kreuger, Ethel
Krebs and Harold Bliss were dinner
guests at John Kreuger's on Sunday
night.

We think Chas. Foss would do a
good business if he quit farming and
took a course in shoemaking, for he
was busy most of Friday night fixing
heels.

We are convinced that Bill has
tired of "bucking," for we hear he
has purchased a pair of ladies' yellow
silk hose, a boy's jersey sweater and
a number of bobby pins. A good
start is one that counts, Bill.

The softball game last Thursday
night between the Melvin and Gar-
field girls, ended in a score of 23-5
in favor of Melvin. The girls return-
ed the game Saturday night, and
the score of 16-17 was again in
Melvin's favor.

BERGEN-NICHE VALLEY

Mr. Eric Lyle has moved onto the
McKnight place, west of the Eids-
wold school.

The heavy rain Friday was very
acceptable, even though haying was
delayed.

Rev. Amos Geiger, of Alsask, has
been holding meeting at the Eidswold
school.

Bill McCurrough has gone 70 mls.
east to help his father harvest. Mrs.
McCurrough will remain on the
homestead and look after the cattle.

Harvey Burgess will teach the
Bergen school again this winter, and
Miss McConnell the Eidswold school
if the salary problem can be solved.

Mr. and Mrs. Oscar Snyder were
suddenly called to go west of Ed-
monton to attend the funeral of Mrs.
Snyder's brother. Mrs. Snyder will
remain with her mother for a few
months.

Mrs. Ben Scott received the sym-
pathy of the people here and at
Three Hills, on the death of her
husband. He was a good neighbor,
a loving husband, and had the re-
spect of all who knew him.

Mountain View Notes

Lester Barnes returned home from
the Hospital last week, and is con-
valescing at home.

Miss D. Brown returned on Wed-
nesday, and will resume her duties
at Mona school September 1st.

Gore school will have Miss Bird-
sell for teacher this year, while the
vacancy at Neapolis is being filled
by Miss Snyder.

Harvest operations were in full
swing in parts of the district, and
several women were observed run-
ning binders and stooking.

WEEKLY JOKE

1st Boy: "I bet my pop can lick
your pop!"
2nd Boy: "And I bet my ma
can lick de two of 'em."

LOCAL & GENERAL

Mrs. P. McNeil and little son
Robert returned home after month's
visit with her mother and sisters at
Portland, Oregon.

Dr. and Mrs. McGuffin and family
of Calgary spent Sunday with Rev.
and Mrs. A. J. Mitchell at the
manse.

Mr. and Mrs. J. Blain and Miss
Ruby Farrell, of Edmonton were
visitors with Dr. and Mrs. Clarke
this week.

The times of services at the rural
appointments of the United Church
change this Sunday, and will be as
follows: Westdale 11 a.m., and
Westcott 3 p.m.

Melvin Huget, who has been on a
motorcycle tour of the coast cities,
returned home Tuesday. He made
his return trip via Idaho and Mon-
tana.

Mr. and Mrs. G. H. Chambers,
of Drumheller, and Mrs. O. Clarke,
of Willow Creek, were visitors with
Mr. and Mrs. H. Speelman last
week.

There will be service at St. Cy-
rian's Church on Sunday at 3 p.m.
Rev. R. K. Trowbridge, who has
returned from his vacation to the
Great Lakes, will conduct the service.

No matter what her past was; no
matter what she had done or what
she is, she was still "His Woman!"
A thrill awaits you at the Opera
House next Monday and Thursday.
Don't miss it.

Mellow melodies and tuney tunes
on Friday, September 9th, when
Mack's Prairie Ramblers, of Calgary
will hold a dance in the Opera House
from 10 p.m. to 2. Admission: 75c
per couple, extra lady 25c. Single-
gent 50c.

NOTICE TO RELATIVES & PERSONS ON THE ASSESSMENT ROLL, AND TO TENANTS.

Notice is hereby given that during
the months of September and Octo-
ber applications may be made under
the provisions of Section 204 of the
Town Act, for inclusion in the Voters'
List of the Town of Didsbury.

The wife, husband, father and
mother, and every son and daughter
of any person whose name appears
upon the Assessment Roll, are en-
titled to be placed upon the said list:

- If he or she is resident with the
said person within the town, or
assists him in a business in respect
of which he is taxable; and
- If he or she is of the full age
of twenty-one years; and
- If his or her name does not
already appear on the roll; and
- If he or she duly makes ap-
plication in accordance with this
notice.

All tenants who have rented an
assessed parcel for a period of twelve
months immediately preceding the
last day of August of this year, and
who duly make application during
the months of September and Octo-
ber, are entitled to be placed upon
the said list.

UNITED GRAIN GROWERS LIMITED.

A dividend at the rate of 5 per
cent has been declared on the
paid-up capital stock of United
Grain Growers Limited, for the
financial year ending July
31st, 1932. Cheques will be
mailed on September 1st, 1932
to shareholders of record at
July 31st.

By order of the Board of
Directors:

R. S. LAW, President.

Winnipeg, Manitoba,
August 25th, 1932.

Here and There

Popularity of Canadian apples
abroad has notably increased, and
last year apple exports to Europe
from Western Canada reached a
new high record of 1,174,000
boxes, as compared with 840,000
boxes in 1930. Fruit growers are
anticipating an even larger crop
this year.

R. Y. Danaud, formerly Travel-
ling Passenger Agent, Canadian
Pacific Railway, Winnipeg, was
appointed District Passenger
Agent, Algonia District, North
Bay, Ont., effective August 15th.
Mr. Danaud has had a long and
successful career with the Com-
pany, and is now receiving con-
gratulations on his most recent
promotion.

Numbers of anglers returning
through Ottawa and Montreal re-
port having experienced exceed-
ingly good bass fishing. This
was the expression of a group
from Cincinnati, Ohio, who recent-
ly visited the bass fishing waters
of the Gatineau River, north of
Maniwaki, according to A. O. Sey-
mour, General Tourist Agent, Cana-
dian Pacific Railway.

This is evidently the peak year
with partridge, one would judge
from the reports emanating from
various parts of the Laurentian
and Gatineau districts of Quebec,
according to A. O. Seymour, Gen-
eral Tourist Agent, Canadian Pa-
cific Railway. In almost every
locality partridge, as the ruffed
grouse and Franklin grouse are
best known, are very plentiful.
Most flocks hatched this year are
nearly full grown.
